

EDUCATION

- Amity School of Engineering and Technology** Noida, India
M.Tech in Data Science Aug 2025 - Present
Courses: Advance Machine Learning, Data Warehousing and Data Mining, Advanced Data Structures, High Performance Computer Architecture.
- State University of New York** Potsdam, USA
Diploma in Data Analytics; CGPA: 8.6 Nov 2024 - May 2025
Courses: Excel, Power Bi, Database Management, Artificial Intelligence, Machine Learning.
- SRM Institute of Science and Technology** Chennai, India
B.Tech in Computer Science and Engineering; CGPA: 8.66 Sep 2020 - June 2024
Courses: OOPs, Data Structures, Machine Learning, Software Project Planning, Artificial Intelligence, Data Pipeline.

SKILLS

- Languages:** Python, SQL
- Core Competencies:** Data Structures & Algorithms, Object-Oriented Programming, Problem Solving
- Frameworks & Libraries:** Scikit-learn, Pandas, NumPy, Matplotlib
- Tools:** Power BI, Tableau, MS Excel, Google Colab, Jupyter Notebook
- Technical Skills:** Machine Learning, Data Preprocessing, Data Visualization, Statistical Analysis
- Soft Skills:** Communication, Team Collaboration, Time Management, Adaptability

EXPERIENCE

- Belstar Microfinance Limited** Chennai, India
Data Analyst Intern Jan 2025 - Jun 2025
 - Data Processing Optimization:** Processed and analyzed large datasets (1 crore+ rows) using Python and SQL to improve reporting efficiency.
 - Automated Reporting System:** Developed Python scripts to automate data extraction, transformation, and report generation, reducing manual effort.
 - Data Cleaning & Transformation:** Used Pandas and SQL to clean, structure, and validate financial data for accurate analysis.
 - Excel-Based Dashboard & Reporting:** Created interactive Excel dashboards and pivot tables to visualize KPIs and financial trends, improving data-driven decision-making.

PROJECTS

- Optimization of Solar Power Generation:**
Overview: Addressed fluctuations in solar energy output caused by variable environmental conditions and system inefficiencies.
Approach: Collected and preprocessed solar performance data using Python and SQL, performed exploratory data analysis (EDA), and visualized key insights through Power BI to enhance energy generation efficiency.
- Optimization of Material Mix and Power Consumption:**
Overview: Tackled inconsistencies in product quality and energy consumption arising from variations in material mix and usage.
Approach: Conducted data preprocessing, EDA, and visualization using Python and Power BI to identify optimal material ratios and reduce production costs.

CERTIFICATIONS

- MS Excel:** 360DigitMG
- Python Programming:** NASSCOM, Udemy, 360DigitMG
- SQL (Structured Query Language):** 360DigitMG
- Power Bi:** 360DigitMG
- Tableau:** 360DigitMG

EXTRA-CURRICULAR ACTIVITIES

- Professional Development & Knowledge Sharing:** Enhanced data analytics skills through real-world projects, online courses, and participation in data-driven hackathons and case studies.
- Data Analytics Community Involvement:** Actively participated in data science forums and college workshops, sharing insights on Excel automation, Python scripting, and visualization best practices.
- Continuous Learning:** Stay updated with emerging data trends, explore machine learning concepts, and apply new techniques to improve data processing and reporting.
